NCBCE AI Fellows

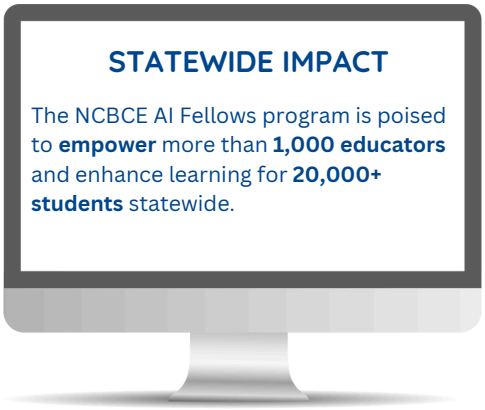
Empowering Educators, Inspiring Innovation

In Partnership with Google.org

Launched in 2025 in partnership with Google.org, NCBCE AI Fellows will generate a network of high-quality, innovative NC educators to serve as artificial intelligence (AI) leaders and mentors in their school communities.

This train-the-trainer model will create expanded learning opportunities for teachers and students throughout the state, sparking enhanced interest and engagement with ethical AI practices, and preparing students with the critical thinking and AI literacy skills essential for today's careers.

Following an application submission and virtual interview, 20 middle and high school educators will be selected each grant year. Applicants may teach in any subject area and have any level of AI experience.



EDUCATOR INCENTIVES AND SUPPORT

Professional Development

- Monthly workshops and trainings from state and national AI leaders throughout the academic year, covering such topics as:
  - AI literacy
  - Pedagogical strategies
  - Curriculum development
  - Leadership skills
- One-week summer in-person intensive training
- CEU credit upon completion

Technology Mini-Grant

Each educator receives a mini-grant that enhances AI instruction and their role as a trainer, covering:

- Technology resources
- Equipment
- Support materials

Community of Support

- Year-long support and mentorship in a Capstone project
- Collaboration and networking opportunities
- Leadership development coaching
- Strong community of like-minded educators and innovators
